FOREWORD

This booklet lists all products carried in regular stock by the Board, and also provides brief answer to questions most commonly asked about our store operation. A section to assist visitors to Alberta is included under the heading "Tourists" in General Information at the back of the booklet.

We endeavor to carry adequate stock of a representative selection of the best and most popular brands. Because it is impossible to carry in stock every item that might be requested, special orders for a minimum of one full case of any brand will be obtained if possible. (Please refer to General Information section.)

We would be pleased to receive your suggestions for improvement of store service, brand selection, or any other phase of our operation. Letters should be addressed to Chairman, The Alberta Liquor Control Board, Box 2360, Edmonton, Alberta T5J 2R4.

WINE

WINE INFORMATION

Wines are listed under five categories, according to the way they are used.

1. **Appetizer Wines**—serve chilled before meals.
2. **Dessert Wines**—range from sweet to very sweet and are usually served at room temperature with dessert.
3. **Red Table Wines**—range from dry to medium dry and are most suitable when served at room temperature with red meat or game.
4. **White Table Wines**—vary from dry to sweet. Dry types are best served with seafood and white meats, and the sweet with dessert. Serve chilled.
5. **Sparkling and Bubbling Wines**—are suitable for serving before or during a meal. They should be chilled.

The question of which wines are best to serve with different foods is difficult to answer since it depends on individual taste or preference. The above suggestions are only a guide.

Sweetness or lack of sweetness for each wine is indicated by an index number after the name. (1) denotes a dry wine, with each higher number through to (20) indicating increasing degrees of sweetness.

Generally speaking Sparkling and Table Wines contain less than 14% Alcohol by volume, and will not keep after being opened.

Appetizer and Dessert Wines contain more than 14% Alcohol by volume and keep quite well after being opened.

Wines should be stored in a cool (55°), dry cellar. Table Wine sealed with a cork should be placed flat on the shelf to keep the cork damp, and prevent the contents from spoiling.

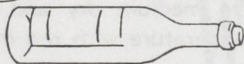

Eventually many wines deposit a sediment which is formed during the natural process of aging. To serve such wines, pour carefully after the sediment has settled.

STORAGE

Wine keeps best in a cool, dark, dry place.

Screw capped bottles of wine should be stored in vertical position.

Bottles sealed with corks should be kept in horizontal position to prevent the corks from drying out.

GLASSWARE

Clear crystal stemware will add greatly to the appreciation of Wine and enhance the appearance of a table setting.

ALL-PURPOSE GLASS

Satisfactory for all Wines. Fill approximately $\frac{2}{3}$ full when serving Red or White Table Wines or Sparkling Wines. About $\frac{1}{2}$ full when serving aperitif or dessert Wines.

PRODUCTS AVAILABLE

Products Listed in this Booklet

Liquor stores with the largest volume and all sell liquor. Some carry all listed brands, and others because it is impractical to carry a full line stock demand is supplementary for certain brands or wine varieties.

Would you desire a particular product which is listed in this booklet but not stocked at the liquor store where you ordinarily shop? The manager will bring in the wine and quantity required. This will mean wondering with how you wish to buy. You may wish to make a reasonable order or more, the store manager will add it to the brands regularly stocked.

GENERAL INFORMATION

This list is subject to change without notice.

The contents shown for each item are approximate. Refer to the statement of contents shown on the bottle or label. Store managers will be pleased to show you a bottle of any brand before you purchase, on request.

TOURISTS

The following information is set out separately to provide a quick reference for visitors.

Alberta Liquor Stores are located in most of the larger towns and in all cities. In rural areas the stores usually are open from 10:00 a.m. to 6:00 p.m., and in larger cities, from 10:30 a.m. to 11:30 p.m. Tourists centre stores are on extended hours during the summer. Detailed store hour information is given at the back of this booklet.

At Jasper and Banff the board carries quite a large number of additional brands during the tourist season. In general, citizens of the U.S.A. can take one bottle of alcoholic beverage back with them, but state regulations vary and in some it is not permitted. If you are doubtful, please ask the store manager for information.

When referring to alcohol content Americans and Canadians use the same words, but they have a different meaning. A chart at the back of this book will help to clarify the question for you. A similar situation exists in respect to liquid measure, and complete information is available from store personnel.

In Alberta it is illegal to consume alcoholic beverages in a public area, which includes your automobile. Bonafide travellers may transport opened bottles provided they are placed in the traveller's luggage with his clothing and necessities of travel. This only covers, very briefly, two aspects of provincial liquor laws, and it is recommended that you pick up a small booklet on the subject available at our stores.

Our store staff are trained to assist you, and will be pleased to do so.

PRODUCTS AVAILABLE

Products Listed in this Booklet

Liquor stores with the largest volume and all self serve stores carry all listed items. At other locations it is impractical to carry a full line since demand is nonexistent for certain brands in some localities.

Should you desire a particular product which is listed in this booklet but not stocked at the liquor store where you ordinarily deal, the manager will bring in the item and quantity you require. This will mean re-ordering each time you need stock, but, if there is a reasonable regular demand, the store manager will add it to the brands regularly carried.

We would be pleased to receive your suggestions for improvement of store service, brand selection, or any other phase of our operation. Letters should be addressed to Chairman, The Alberta Liquor Control Board, Box 2360, Edmonton, Alberta T5J 2R4.

Should you feel you are not receiving every assistance in obtaining the product of your choice listed in the book, it would be appreciated if you would telephone or write the Stocks Director, The Alberta Liquor Control Board, Edmonton, Alberta.

Additional Products

In addition to the products listed here, a selection of high quality wines and liquors is carried in specialty stores located in Edmonton and Calgary. Please ask your store manager for printed information.

Special Orders

If you wish to order a product that is not listed, please write to The Alberta Liquor Control Board, Box 2360, Edmonton T5J 2R4, giving full particulars. If it can be obtained you will be advised of the price and approximate delivery time. A deposit is necessary if you then decide to order, and the minimum quantity is one case of each brand or size.

BLOOD-ALCOHOL CHART

For Use BEFORE Drinking

The Edmonton Safety Council, 10526 Jasper Avenue

Prepared by THE ALBERTA SAFETY COUNCIL

ALCOHOL WILL AFFECT YOUR DRIVING ABILITY

The PERCENT of alcohol in a person's blood is a guide to how much your driving may be impaired.

To estimate the percent of alcohol in the blood, follow these directions:

1. COUNT YOUR DRINKS (1 drink equals 1½ oz. spirits or 3 oz. of wine or 12 oz. of beer).
2. Refer to the BLOOD ALCOHOL CHART below. Under the number of drinks and opposite your body weight, find the percent of blood alcohol listed.
3. Subtract from this number the percent of alcohol burned up in your body during the time elapsed since your first drink.

Hours since first drink	1	2	3	4	5	6
Subtract from blood alcohol	.015	.030	.045	.060	.075	.090

Example:

150 lb. man, 4 drinks in 3 hours = .116 minus .045 = .071%

150 lb. man, 6 drinks in 4 hours = .174 minus .060 = .114%

BLOOD ALCOHOL CHART

Showing estimated % of alcohol in the blood by number of drinks in relation to body weight. (1 drink equalling 1½ volume-oz. of rum, rye, scotch, brandy, gin, vodka, etc.; 1 12-oz. bottle of beer; or 3 oz. of wine.)

Count 1 drink of over-proof rum as 2 drinks.
